## EXPERIENCE

### Front-End Developer

**Infoleven**

📅 10/2018 - 05/2020    📍 Sofia

In my last 2 years, I was working with React and React Native. My role was Junior Front-end Developer. I had a chance to learn from a really good senior in React and that helped me a lot because I started to write a cleaner and reusable code, to use good front-end libraries, to make responsive designs and to some good code practices.
I'm so glad that I had the chance to work on two bank mobile applications which they give me experience with React Native. Most of all I was working on responsive websites.

## EDUCATION

### JavaScript Developer. Computer Programming/Programmer, General

**Software University (softuni.bg)**

📅 2018 - 2019
